New Centre to Provide Totally Non-invasive Comprehensive Radiological Imaging of the Cardiovascular System

In addition, CMR is an excellent test for assessing whether the patient's heart muscle is irreversibly damaged or still viable and whether bypass surgery or angioplasty will benefit the patient. It might be especially useful when other conventional tests for assessing the viability of heart muscle have borderline results. The choice of which test to use is based on the individual patient's condition.

Memorandum of Understanding

In conjunction with the official opening of SCAN CVI, SGH and Siemens will be signing a Memorandum of Understanding to establish SCAN CVI and the Department as a reference site for state-of-the-art imaging in Southeast Asia where joint training programmes, clinical trials and developmental projects will be conducted.

Said Mr Adam Lim, General Manager, Siemens Pte Ltd, Medical Solution, "The SGH -Siemens Memorandum of Understanding is a milestone for us to demonstrate our commitments and contributions to the healthcare community. This collaboration will help propel Singapore further as a Centre for Medical Excellence."
